political theorists jeremy elkins and andrew norris observe that american political culture is deeply ambivalent about truth on the one hand voices on both the left and right make confident appeals to the truth of claims about the status of the market in public life and the role of scientific evidence and argument in public life human rights and even religion on the other hand there is considerable anxiety that such appeals threaten individualism and political plurality this anxiety elkins and norris contend has perhaps been greatest in the humanities and in political theory where many have responded by either rejecting or neglecting the whole topic of truth the essays in this volume question whether democratic politics requires discussion of truth and if so how truth should matter to democratic politics while individual essays approach the subject from different angles the volume as a whole suggests that the character of our politics depends in part on what kinds of truthful inquiries it promotes and how it deals with various kinds of disputes about truth the contributors to the volume including prominent political and legal theorists philosophers and intellectual historians argue that these are important political and not merely theoretical questions

how should we share the truth about the environmental crisis at a moment when even the most basic facts about ecology and the climate face contestation and contempt environmental advocates are at an impasse many have turned to social media and digital technologies to shift the tide but what if their strategy is not only flawed but dangerous the truth about nature follows environmental actors as they turn to the internet to save nature it documents how conservation efforts are transformed through the political economy of platforms and the algorithmic feeds that have been instrumental to the rise of post truth politics developing a novel account of post truth as an expression of power under platform capitalism bram büscher shows how environmental actors attempt to mediate between structural forms of platform power and the contingent histories and contexts of particular environmental issues bringing efforts at wildlife protection in southern africa into dialogue with a sweeping analysis of truth and power in the twenty first century büscher makes the case for a new environmental politics that radically reignites the art of speaking truth to power

ideas and the presidency flirt with each other but can they really get along president clinton had a romance with big ideas he intently cultivated intellectuals seducing them with his characteristic charm and with the promise of real influence on the political stage yet most often he disappointed the big thinkers whose advice he sought benjamin barber was first invited to camp david in 1994 along with other prominent members of the academic community to participate in a seminar with president clinton on the future of democratic ideas and ideals afterwards he became a steady informal adviser to the white house for a politically committed professor like barber the opportunity was exhilarating here was an opportunity to put ideas into action to link ideas to power the result was enlightening if unexpected the most unpredictable factor was the president himself a man of astonishing intellectual gifts a consummate listener and synthesizer of ideas who nonetheless failed to present a stirring progressive vision or even to craft a memorable speech with great perceptiveness wit and élan barber provides a startling meditation on truth and power and the truth of power which is the responsibility of the elected not to an idea but to the electorate he identifies the fault lines that future progressive candidates must straddle if they are to win and the gift they must have if they are to be great of calling forth the best in their fellow citizens in the end barber give us a unique portrait of our compelling and maddening ex president and the hopes and disillusionments he represents

with the constitution of power mark haugaard provides an introduction to the analysis of social and political power and discusses the relationship between power structure and knowledge

truth is in trouble in response this book presents a new conception of truth it recognizes that prominent philosophers have questioned whether the idea of truth is important some have asked why we even need it their questions reinforce broader trends in western society where many wonder whether or why we should pursue truth indeed some pundits say we have become a post truth society yet there are good reasons not to embrace the cultural zeitgeist or go with the philosophical flow reasons to regard truth as a substantive and socially significant idea this book explains why first it argues that propositional truth is only one kind of truth an important kind but not all important then it shows how propositional truth belongs to the more comprehensive process of truth as a whole this process is a dynamic correlation between human fidelity to societal principles and a life giving disclosure of society the correlation comes to expression in distinct social domains of truth where either propositional or nonpropositional truth is primary the final chapters lay out five such domains science politics art religion and philosophy anyone who cares about the future of truth in society will want to read this pathbreaking book

this book draws attention to certain significant changes in the way in which power has been defined and it also examines some of the critical responses which those changes have evoked the objective is not to try and evolve a universally acceptable and comprehensive definition of power and of related terms like authority and influence the argument of the book is that that would be an impossible project since social and political theories themselves constitute an intervention into political discourse of a society and they may implicitly or explicitly embody a political perspective

in these essays visker fund for scientific research institute of philosophy responds both to those critics of foucault who place post structuralism in opposition to phenomenology and those who dismiss foucault s work out of hand as crass relativism the essays consider the relationship between foucault s work to that of the phenomenologists especially heidegger the role of intersubjectivity in the works of foucault and merleau ponty and the view of the self that emerges from the writings of foucault and levinas annotation copyrighted by book news inc portland or

Getting the books **Discipling Nations The Power Of Truth To Transform Cultures** now is not type of inspiring means.
